

# Baby Crib 381

Infant bed Baby Crib 381 is a handy aid for the nursing of newborns. The crib can be positioned across the bed of the mother, thus allowing convenient access to the baby. The large Ø100 mm castors make the crib easy to move and they are equipped with brakes (2 pcs) to hold the crib safely in place. Trendelenburg and anti-Trendelenburg adjustments are stepless.

The baby Crib 381 is light to handle and easy to clean. Baby Cribs can be stacked together for transportation or storage. The frame is chrome plated, mattress base perforated and the crib of transparent acrylic.
